PROFILE

B.Tech Computer Science Engineering student specializing in AI and Data Analytics with hands-on experience in Machine Learning, data engineering pipelines and full-stack application development. Looking forward to working on enterprise-scale solutions and contributing to complex data engineering challenges.

SKILLS

Programming Languages: Python, C, C++, Java, C#, JavaScript (Node.js, React.js), SQL
AI & ML: PyTorch, Tensorflow & Tensorboard, Ollama, Huggingface, Scikit-learn, OpenCV, Pandas
App Development & Frameworks: Android Studio, Flutter, Figma, Flask, Django, DotNet, Express, React Native, REST APIs
Database Systems: MySQL Workbench, Supabase (BaaS) and MongoDB Atlas
DevOps, Software & Systems: Docker, Git, CI/CD, Tableau, Power BI, Vim, Linux
Other Software skills: Game Development (Unity), Blender, Multimedia Editing (Adobe premiere pro, Audacity, Affinity)

EDUCATION

SRI RAMACHANDRA INSTITUTE OF HIGHER EDUCATION AND RESEARCH
FACULTY OF ENGINEERING AND TECHNOLOGY Chennai, Tamil Nadu
Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence and Data Analytics). 2023 - 2027

EXPERIENCE

HTIC, IIT-MADRAS RESEARCH PARK - AI Research Intern May 2025 - June 2025, (Chennai, Tamil Nadu)
Worked in the field of medical imaging for detection and classification of abnormalities and anatomical landmarks in real-time endoscopic video inference on edge devices. Developed Knowledge distillation pipeline, optimized deep learning models, benchmarked all models, and documented their performance.

INEM TECHNOLOGIES - AI Intern December 2025 - January 2026, (Remote)
Implemented Database and designed pipeline for implementing AI features in an AI assisted Ed-Tech web application platform developed using Django.

PROJECTS

DEVO: AI DEVOPS AGENT May - June 2025

- Built an autonomous AI agent to simplify the software development lifecycle by automating containerization and deployment workflows.
- Combined LLM capabilities with Docker and GitHub APIs to automatically create configuration files and start CI/CD pipelines, cutting down on manual deployment tasks.

BIOPSY AND ABNORMALITY REPORTING SYSTEM IN ENDOSCOPY June - July 2025

- Developed a computer vision system to automatically detect and classify polyps, anatomical locations, and biopsy instruments in real-time endoscopic feeds.
- Engineered an automated medical reporting pipeline that translates visual data into clinical logs, significantly reducing manual data-entry errors for gastroenterologists.

REWEAR June – July 2025

- Developed a peer-to-peer e-commerce marketplace promoting circular fashion and clothing reuse.
- Designed a responsive frontend UI and implemented secure backend routing for user authentication and product listings.

OTHER PROJECTS

- **Custom_LLM (200M Param) :** A lightweight, resource-efficient Large Language Model (LLM)
- **VRam Estimation for Diffusion models :** estimate GPU memory usage during inference for the Stable Diffusion models

ACHEIVEMENTS AND PARTICIPATION

- 2nd Prize at AI Summit Hackathon conducted by SRM Katangulathur. Awarded ₹7500 cash prize for innovative AI project (Hercules-GPT) presented as a team.
- Presented the paper "Penile Curvature Quantification in Hypospadias Surgery using Deep Learning and Circle-Fit Optimization" in IEEE CICT 2025 held at IIITDM Kancheepuram (Published). DOI: 10.1109/CICT67193.2025.11398889
- Participation in TechExpo (2023, 2024, 2025) organized by Sri Ramachandra Faculty of Engineering and Technology.
- Participated in Hackfinity 24Hrs Agentic AI Hackathon conducted by SIMATS Engineering.

LANGUAGES

TAMIL, ENGLISH, HINDI
