OBJECTIVE

B.Tech Computer Science Engineering student specializing in AI and Data Analytics with hands-on experience in Machine Learning and full-stack application development. Looking forward to working on enterprise-scale projects and contributing to innovative software engineering solutions.

EDUCATION

BACHELOR OF TECHNOLOGY – COMPUTER SCIENCE ENGINEERING	Porur, Chennai, Tamil Nadu
Sri Ramachandra Institute of Higher Education and Research, Faculty of Engineering and Technology.	2023 – 2027
HIGHER SECONDARY (CBSE)	Adyar, Chennai, Tamil Nadu
Kendriya Vidyalaya CLRI.	2021 - 2023

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, C#, JavaScript, SQL

AI & ML: PyTorch, Tensorflow & Tensorboard, OpenCV, Huggingface, Ollama & OpenAI API models

App Development: Node.js, Express, React.js, Next.js, React Native, Flask, Django, Flutter, DotNet, REST APIs

Database Systems: MySQL Workbench, Supabase (BaaS) and MongoDB Atlas

DevOps, Tools & Software: Docker, Git, CI/CD, Tableau, Power BI, Vim, Linux

INTERNSHIPS

AI INTERN - INEM TECHNOLOGIES December 2025 - January 2026, (Remote)
Implemented Database and designed pipeline for implementing AI features in an AI assisted Ed-Tech web application platform developed using Django.

AI RESEARCH INTERN - HTIC, IIT-MADRAS RESEARCH PARK May 2025 - June 2025, (Chennai, Tamil Nadu)
Worked in the field of medical imaging for detection and classification of abnormalities and anatomical landmarks in real-time endoscopic video inference on edge devices. Developed Knowledge distillation pipeline, optimized deep learning models, benchmarked all models, and documented their performance.

PROJECTS

AUTOCAD VALIDATION AGENT PLUGIN April 2026
An intelligent, reasoning-capable AI assistant integrated directly into AutoCAD (2025/2026+) using the .NET 8.0 and OpenAI-compatible LLM providers. This agent doesn't just chat; it edits and modifies designs in your current viewport using chain-of-thought reasoning, thread marshalling, effective tool-calling and recursive orchestration loop.

CARELINK January - February 2026
Developed a comprehensive healthcare mobile + web application using ReactJS & React Native, delivering a seamless cross-platform experience for telemedicine, symptom checking, doctor consultation and emergency response.

DEVO: AI DEVOPS AGENT May - June 2025
Built an autonomous portable AI agent to simplify the software development lifecycle by automating containerization and deployment workflows. Combined LLM capabilities with Docker and GitHub APIs to automatically create configuration files and start CI/CD pipelines, cutting down on manual deployment tasks.

OTHER PROJECTS

Custom_LLM: A lightweight, resource-efficient 200M parameter Large Language Model.

168 RAG chatbot: AI chatbot with Retrieval-Augmented Generation (RAG) capabilities using ChromaDB.

Fixbridge: Marketplace connecting device owners with verified repair shops for PCs, laptops, etc. Built using React+NextJs.

ACHEIVEMENTS AND CO-CURRICULAR ACTIVITIES

- 2nd Prize at AI Summit Hackathon conducted by SRM Katangulathur. Awarded ₹7500 cash prize for innovative AI project (Hercules-GPT) presented as a team.
- Presented and published the paper “Penile Curvature Quantification in Hypospadias Surgery using Deep Learning and Circle-Fit Optimization” in IEEE CICT 2025 held at IIITDM Kancheepuram. DOI: [10.1109/CICT67193.2025.11398889](https://doi.org/10.1109/CICT67193.2025.11398889)
- Published the work “CurvAssist: an AI assisted pipeline for penile shaft segmentation/ curvature measurement in children with hypospadias” in the Journal of Pediatric Urology. DOI: [10.1016/j.jpuro.2026.105877](https://doi.org/10.1016/j.jpuro.2026.105877)
- Participation in TechExpo (2023, 2024, 2025) organized by Sri Ramachandra Faculty of Engineering and Technology.
- Participated in Hackfinity 24Hrs Agentic AI Hackathon conducted by SIMATS Engineering.

LANGUAGES

TAMIZH - Native, ENGLISH - Proficient, HINDI – Limited working proficiency
